Notes for your designer

Product: **Kappaphycus alvarezii 19.5% (liquid)** (Schedule VI, Part A, category 2, serial 14; S.O. 3741(E), 13-08-2025).

1. Each product has a FRONT label (a simple standard layout for your licence file: your designer adds your brand name and artwork, keeping the heading word, the product name and the net quantity) and a BACK label with every particular. Keep the back label's heading word, product name and figures exactly as given.
2. The heading word must be printed conspicuously (FCO clause 21). Packs of 5 kg or less may carry the particulars on a label securely affixed to the pack.
3. Clause 21 allows only the particulars required by the Order or by another law ("nothing else"): do not add claims, crops, doses or benefits that are not notified.
4. Legal Metrology (Packaged Commodities) Rules, 2011: print the declarations on the principal display panel, legible and prominent, with the minimum letter height for your pack's panel size (rule 7). A blank line means: fill it in for each batch or pack (MRP, unit sale price, batch, dates).
5. Biostimulants: the crops and doses are exactly as notified. Industry associations report a 2025 Ministry direction for a QR code on biostimulant labels; check with your association before printing.
6. Prepared from the Fertiliser Control Order, 1985 as amended up to the latest notification checked by NanoKheti. The Gazette text is authoritative, and the manufacturer, packer or importer is responsible for the label.
